Experience

Working student in the Logistics Department September 2025 - Current
POCO Einrichtungsmärkte GmbH, Munich, Germany

- Achieved zero inventory discrepancies in the assigned area through consistent stock accuracy, labelled location management, and timely discrepancy resolution.
- Collaborated cross-functionally with warehouse, logistics, and customer service teams to reduce discrepancies and cycle times.
- Contributed to consistently reduced customer returns, lower order cycle times, and sustained high-volume operations with optimized labor requirements.

Trainee Engineer in Research and Development Department August 2022 - January 2023
Crompton Greaves Power and Industrial Solutions Limited, Nashik, India

- Designed and effectively planned to reduce the number of parts to achieve cost reduction.
- Improved proficiency in designing methodologies.
- Utilized 2D drafting skills to generate production ready, accurate, and detailed drawings.
- Incorporated designing principles to redesign assemblies and created standard parts library.
- Collaborated cross-functionally with design, procurement, and logistics teams to execute material planning using SAP ERP (R/2) and ensure on-time delivery.

Intern in Production Planning, Control, and SCM Department November 2021 - May 2022
Bosch, Nashik, India

- Utilized SAP ERP software (R/3) for inventory tracking and process optimization throughout production planning.
- Created Value Stream Map (VSM) to analyze production workflow, identify bottlenecks, and support root cause analysis of inefficiencies.
- Standardized FIFO and inventory levels to reduce non-value-added time and lead time, contributing to improved OEE.
- Applied Kaizen principles to visualize and manage inventory levels.
- Implemented Japanese 5S principles to standardize workspace organization and reduce search time.
- Applied GEMBA principles to identify hidden waste through root cause analysis on the shop floor.
- Collaborated cross-functionally with production, quality, and logistics teams; used in-house Scrum software as Project Management tool.

Education

Master: Engineering and Management (Industrial Engineering) October 2023 - Current
Technische Hochschule Ingolstadt, Ingolstadt, Germany
Majors: Production Systems, Lean Manufacturing, Logistics, Supply Chain Management

Bachelor of Technology: Mechanical Engineering August 2019 - May 2022
MIT World Peace University, Pune, India
Majors: Industrial Engineering, Production Systems, 2D & 3D Modeling (Autodesk Suite)

Skills

Technical Skills

- Lean Six Sigma White Belt Certified (DMAIC methodology)
- SAP ERP (S/4HANA, R/3, R/2 Inventory management)
- Jira (Project Management)
- MS Office (Excel, Word, PowerPoint, Outlook, Teams)
- Autodesk, PTC (CAD/Design Tools)

Languages

- German – B1-B2 (Intermediate)
- English – C1 (Fluent)
- Marathi, Hindi – Native

Soft Skills

- Proactive and Structured working style
- Intercultural Communication & Reliability
- Collaborative & Team-oriented
- High attention to detail

Projects

Master Thesis: June 2026 - Current
Feasibility of implementing a deposit refund system in India: Lessons from Germany's Pfand model

Operations Industrial Engineer: Layout Optimization June 2026
Siemens Mobility, Forage Job Simulation

- Identified bottleneck operations and proposed layout change for an assembly section to improve production workflow and operational efficiency.

Industry project: Research and Development of a testing setup August 2022 - January 2023
Crompton Greaves Power and Industrial Solutions Limited, Nashik, India

- Developed a variable testing setup to evaluate a new eco friendly gas.
- Carried out testing to check multiple conditions.

Bachelor Thesis: Lean Organization implementation in the Value Stream November 2021 - May 2022
Bosch, Nashik, India

- Achieved a measurable reduction in inventory by standardizing FIFO and implementing 5S principles.
- Optimized consumption control through Kaizen visualization techniques.

Diploma Thesis: Design and Development of Press Tool December 2018 - April 2019
Suyash Enterprises, Nashik, India

- Engineered a single progressive press tool to replace three separate tools (blanking, piercing, forming).
- **Result:** Reduced cycle times, lowered manufacturing costs, and cut electricity consumption by consolidating three machines into one.

Co-curricular

drinktec 2025 - World's Leading Trade Fair for Beverage Industry September 2025
Trade Fair Center Messe München, Munich, Germany

- Explored state-of-the-art technologies in sustainable packaging, manufacturing, automation, and circular economy solutions across the global supply chain.
- Engaged with industry experts and machinery suppliers to examine eco-friendly packaging trends, resource-efficient production, and smart factory solutions.

Industrial Field Visit – Beverage Packaging & Recycling Systems June 2025
Krones AG, Regensburg, Germany (via Technische Hochschule Ingolstadt)

- Completed a guided industrial plant tour analyzing end-to-end bottle manufacturing, high-volume automation, and sustainable packaging machinery processes.
- Evaluated industrial recycling infrastructure and closed-loop deposit refund (*Pfand*) system strategies applied in large-scale production facilities.

Lean Leadership Training December 2023
Audi Akademie, Ingolstadt, Germany

- Hands-on program with a live production simulation applying Toyota Way principles: waste elimination, Value Stream Mapping, and process redesign, alongside team-based problem-solving.
